

OPENING SCREEN – Opening screen of the application should reflect the job types for user selection.

Selection Options:

- LINER
- FORWARDING
- CROSS TRADE
- OTHERS

When the user selects **“Forwarding”** as the job type, the system should allow the process flow to continue as follows:

WORK FLOW PROCESS CHART

The Documentation workflow stagewise process given below:

SL. NO	STAGES	STAGE OWNER	DESCRIPTION	NEXT ACTION	NOTIFICATION
1	STAGE 1	SALES TEAM	Request Initiated by SALES team	The Flow moves for SALES HOD Approval / CSV team to update further details	CS / SALES HOD / CNF (If Transportation selected)
2	STAGE 2A	CSV TEAM	CS team to update basic details	Once CS team update the details CNF will be able to view the info to prepare load list (STAGE 2B Parallel Activity)	CNF TEAM
3	STAGE 2B	SALES HOD	SALES HOD Approval	SALES HOD will approve and then CNF will be able to upload Load list (STAGE 2A Parallel Activity)	CS/ CNF Teams
4	STAGE 3	CNF	CNF Team will upload Load list	After load list updating the flow moves to CS team	CS TEAM
5	STAGE 4A	CSV TEAM	CS team will upload HBL Document (Only When HBL is selected) & Select CS HOD	DOCS team can only view the HBL document	DOCS TEAM
6	STAGE 4AA	DOCS TEAM	Docs team can view BL document	Parallelly CS will upload LPO & Invoice	NO
7	STAGE 4B	CSV TEAM	CS team will upload LPO or Invoice	After LPO upload, CS HOD Approval is required, (DMS should move for CS HOD approval, even if either 1 doc is uploaded) with separate remarks -free input field	CS HOD
8	STAGE 5	CS HOD	CS HOD will approve the request	After CS HOD Approval, Accounts team will update payment details & view the Doc and this doc should link to IAS DMS	ACCOUNTS / CS TEAM

9	STAGE 6	ACCOUNT S	Accounts will Upload Payment Slip	After accounts update, CS should get the notification for pending Docs	CS TEAM / CNF TEAM
10	STAGE 7	CSV /CNF TEAM	Pending Docs Upload	System to send a reminder after 2 days of accounts updation for pending docs. FAC upload field will appear only if FAC is selected during sales input stage	CS /CNF Team

Liner Business– This business, Conditional Flow Based on LPO/Invoice Selection is required.

Provide a **Yes/No selection field** before the **LPO** and **Invoice** fields to control the process flow based on user input.

- If the user selects “**No**”:

The system should end **the forwarding process flow** and go with the conditional flow as specified in stage 5.

Step 1: Sales Input

Stage Owner	Sales Person
Activity Type	New Request Creation
Notification	CS/ HOD/ CNF team (if Transportation selected)
Next Stage	SALES HOD Approval / CS Team Updation
Mandatory	Input fields

Include the Liner workflow at stage 5

Liner Business– Conditional Flow Based on LPO/Invoice Selection

Provide a **Yes/No selection field** before the **LPO** and **Invoice** fields to control the process flow based on user input.

- If the user selects **“No”**: the DMS should halt the process flow and the alert message should be triggered, informing the user that required uploads are pending.
- This alert should be based on the Haulage field uploads:
The Haulage upload field (new to be released) and provide free-text remark input field for user to mention completed, the system should then generate the pending list
The list should clearly identify which documents are missing

Cross Trade Business –

Provide a conditional flow at Stage 5 of the Cross Trade workflow

Place a Yes/No selector before Release Order upload fields

- If user selects **“No”**:
 - The DMS should halt the process flow
 - For any payment to be processed under the Cross Trade shipment (FWD), a ‘Yes/No’ selector must be provided for the user to upload the LPO/Invoice. Since the BOC, Haulier cost sheet, Haulage Note, and Load List fields do not fall under this job scope, the user will only use this selection when a third-party payment is required.
 - Once LPO/Invoice uploaded and approves, system should initiate CS HOD & Accounts approval
 - Finally an alert message must be triggered, informing the user that required uploads are pending, based on user input regarding LPO and Invoice uploads & completion of necessary approvals.

UNDER ATTACHMENTS WITH COMMENTS SECTION

Currently DMS allows users to upload pending documents at this stage. However, there is no mechanism to associate remarks or contextual input with each uploaded file.

Required changes:

Provide an input text field adjacent to each document upload slot.

This field should allow users to enter remarks or descriptions that are directly linked to the corresponding upload.

The system should ensure that:

Each input field is stored and retrievable alongside its related document, for traceability and clarity of uploaded content.

USERS MAPPING

The list given below is the users mapped for respective department activity in the workflow UAT.

Department User

SALES TEAM - Sales Persons(PIC who is initiating the booking request)

CS TEAM – SSACSV@SHARAFSHIPPING.COM

CNF TEAM – SSACNF@SHARAFSHIPPING.COM

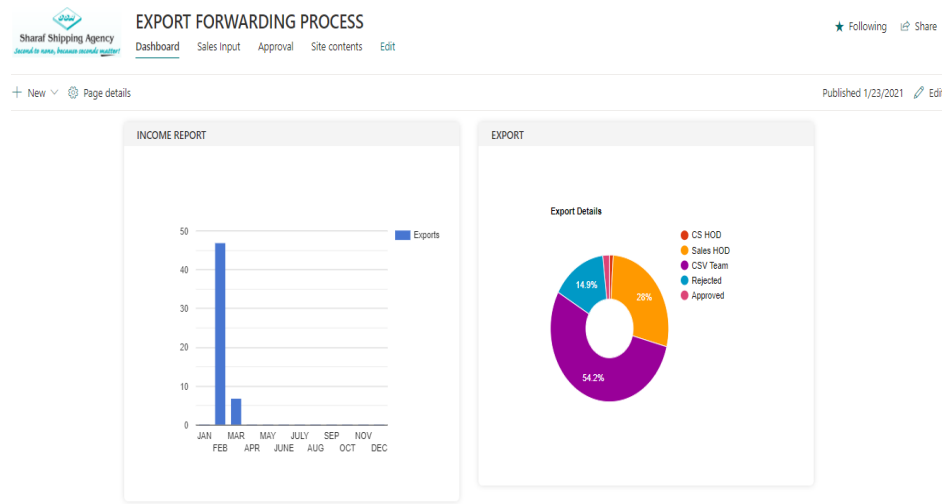

DOCS TEAM - ssadocumentation@sharafshipping.com

ACCOUNTS TEAM - Sandeepsen - ganesh.s@sharafshipping.com

SALES HOD / CS HOD (whoever the PIC marked by Sales)

DASHBOARD & REPORTS

All Business users mapped to the system will have a Dashboard to view the status of the request processed by the respective user. This should identify the pending tasks at any point of time.

Liner Business – The logic and requirements for the **Liner Business** flow have already been detailed in the respective stage of the process documentation.

OTHERS –

When the user selects “OTHERS” as the job type, the system should display the following fields:

1. **CARRIER**
 - Free text remarks input field
2. **VSL/VOY**
 - Free text remarks input field
3. **POL (Port of Loading)**
 - Free text remarks input field
4. **FREIGHT MANIFEST**
 - Document upload field
 - Free text input field for remarks or description

5. LOAD LIST UPLOADING

- Document upload field
- Free text input field for remarks or description

6. TDR/Sailing Report

- Document upload field
- Free text input field for remarks or description

7. OTHER DOCS (for rest of the docs upload, if any)

- Document upload field
- Free text input field for remarks or description

Notes:

- All fields should be editable and clearly labelled
- Upload fields must support standard document formats (e.g., PDF, emails).
- Free text Input fields should be linked to their respective uploads.

Admin Permission Requirement – Document Modification & Removal

1. To maintain data integrity and audit control, any **modification or removal or re-upload** of uploaded documents must require **admin user authorization**.

(cro , lpo, invoice, BL, Haulier sheet, Load list, ED, any uploaded doc)

Edit or Delete Actions:

- Users attempting to modify or delete any of the above documents/mandatory fields must trigger a **permission check**.
- The system should prompt for **admin approval** before allowing the action.
- All changes or deletions, approvals must be **logged with time-stamp, user ID, and admin approver ID**.

Additional Improvements:

1. CRO Upload Enhancement (*Liner & Forwarding*)

- Add multiple CRO upload fields-user should be able to create the additional upload fields.
- Include a free text input remarks column linked to each CRO upload.

2. Expanded ETA Fields (*Liner & Forwarding*)

- provide the following additional fields:

- POL VSL Initial ETA
- POL VSL Latest ETA
- POL ETD
- POD ETA

- These fields should replace the current single ETA field for better scheduling accuracy.

3. LPO & Invoice Approval Flow (*Forwarding & cross trade Only*)

- Add additional columns for LPO and Invoice. (user should be able to add on multiple upload fields)
- Integrate an approval workflow involving:
 - HOD
 - Accounts
- Include a free text input remarks field for each approval stage.

4. ETA Column Persistence Issue (*Liner & Forwarding*)

- Fix the issue where the ETA column disappears after saving
- Ensure ETA values are retained and visible always...

5. ED Field (*Liner & Forwarding*) – new requirement

- Add a separate field for ED (Export Declaration) uploads.. (user should be able to add on multiple upload fields)
- Include a free text input remarks field alongside it.

6. Overseas Agent Name Field (*Forwarding Only*)

- Introduce a free input field to capture agent's name for overseas forwarding bookings.

7. Pre-Alert Upload Field

- Add a dedicated Pre-Alert document upload field.

8. Haulage Note Upload

- Include a Haulage Note upload field.(multiple uploading required)
- Provide a free text input remarks field linked to the upload.

9. User-Defined Reports

Enable generation of custom reports based on user-defined fields

(attached format)

- A Dashboard is required for the User to track the shipment details

10. Sales Booking alert should reflect the POD

Special Note :

- Approval History Tracking:
At every stage, once a user approves a process, the system should log and display the approval history for audit and traceability.
- Workflow Completion Status:
Once all required documents are uploaded, the system should automatically update the status to “Workflow Completed.”
- Any **removal or edit** of documents/[field](#) by a user ([Sales Input stage, especially the container details, Special instructions, Other charges](#)) **before/after process completion** must be **captured in an audit report** and made **available in the system history** should be visible for all users

END OF SECTION
